

Choose for the job.

Product reference | Luggage wrapping station

01

Check shape & support

Confirm how soft bags, hard cases and irregular luggage will sit on the support area.

02

Share the luggage range

Provide minimum and maximum dimensions, weight and photos of unusual shapes.

03

Define the finish

State which surfaces need coverage and the expected pieces per hour.

MODEL TIP

Wrapping weight and turntable load rating are different checks; use the approved luggage limit for the order.

LUGGAGE STRETCH WRAPPER

INSTALLATION CHECK

Prepare before arrival.

Site reference | Luggage wrappers in the workshop

01**Set the operating position**

Move the machine using its intended method and secure it as instructed before use.

02**Plan the workspace**

Allow for the full luggage sweep, loading, unloading and operator movement.

03**Confirm the supplied version**

Check power, controls and any ordered options before commissioning.

MODEL TIP

Confirm the exact silver/red version and any weighing option separately from the standard wrapping setup.

APPLICATION GUIDE | fyxferpack.com

Application guidance. Follow the supplied machine manual.

LUGGAGE STRETCH WRAPPER

OPERATION GUIDE

Make each run repeatable.

Handling detail | Turntable and luggage supports

01**Use the luggage supports**

Position and stabilize the item with the supplied support arrangement before wrapping.

02**Prepare the luggage**

Secure loose handles, straps and accessories before positioning the item.

03**Check after the full stop**

Inspect coverage and finish; remove the luggage only when movement has stopped.

MODEL TIP

Finish film handling only when safe to approach; manual film attachment or cutting may be required by the supplied version.

Application guidance. Follow the supplied machine manual.

Keep the essentials ready.

Service detail | Internal drive and chain arrangement

01

Check supports & mobility parts

Inspect support rods, turntable and the fitted moving or securing components.

02

Keep the film path clean

Remove film scraps from approved access areas using the specified method.

03

Service safely

Isolate energy before cleaning or checking internal moving parts.

MODEL TIP

Keep loose straps and film scraps away from the turntable and lower moving parts.

USEFUL DETAILS FOR YOUR NEXT CHECK

Support and turntable condition

Find the cause first.

Control detail | Screen, controls and emergency stop

01

Luggage shifts

Stop and recheck the luggage shape, support position and approved settings.

02

Film tears or wrinkles

Check film condition, sharp corners, threading and the approved settings.

03

Machine will not cycle

Record the alarm and check normal ready conditions without bypassing safeguards.

MODEL TIP

Do not hold shifting luggage while the turntable is moving.

Film detail | Roll support and loading spindle

01**Group similar luggage**

Trial repeatable settings for the common sizes and shapes handled at your location.

02**Time a realistic cycle**

Include loading, wrapping, finishing and unloading using typical luggage.

03**Track film use**

Compare consumption only when the required coverage and finish are achieved.

MODEL TIP

Record accepted coverage and handling time so faster wrapping does not create extra rework.
